

BIG DOG T2000

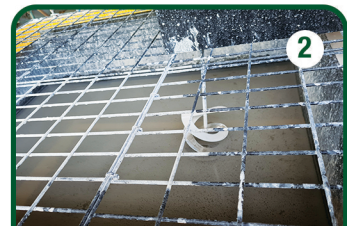

AUTOMATED SLURRY WASTE MANAGEMENT BIN

An automated slurry processing system that can be used onsite!

- Process up to 250 Liters of slurry wastewater every 5 minutes.
- Process paint washout water.
- Turn wastewater into clear reusable water.
- Reduce waste by 90%
- Easily transport treated waste for compliant disposal.
- Avoid EPA fines.
- Custom made to suit individual requirements.
- Made in Australia.

Wastewater is dispensed into the top hat lid above

Then blended with the added SlurrySep Flocculant

The treated waste is discharged into the dewatering bag.

Clean water filters out from the tap below; trapping solids in the dewatering bag for easy disposal.
